Above standard colors are made with VOC free commercial grade pigments and are formulated for a solid color opaque finish. Choose from the Eco-Tuff H.T. Coating or Rubberized Non-Skid Coating tint base. Optional VOC free Infrared Reflective (I.R.) pigments are also available for the ultimate exterior U.V. protection. Colors shown are representative of actual colors which may vary from web or print image. You may order sample colors from your dealer or online at www.ecosafetyproducts.com to perform a color test. Optional 30 mesh recycled glass or 80 mesh recycled glass powder aggregates are available for alternative non skid texture when used in the H.T. Coating.
