SUBMARINE	TERRACOTTA	WALNUT	WHITE	WINTER GOLD

All colors are made with VOC free commercial grade pigments and are formulated for semi-transparent natural stone effects when used with SoyCrete. Optional VOC free Infrared Reflective (I.R.) pigments are also available for the ultimate exterior U.V. protection. Colors shown are representative of actual colors which will vary by web, print, substrate color and type. You may order sample colors from your dealer or online at [www.ecosafetyproducts.com](http://www.ecosafetyproducts.com) to perform a color test. SoyCrete is not a paint film technology to hide imperfections. It relies on penetration for integral coloring, natural mottling, and bonding to eliminate peeling for longer lasting durability.
